

Alpha Federal is a U.S.-based special-mission integrator. We design, stand up and operate airborne ISR, border and territorial security, counter-narcotics, command-and-control and capability-transfer programs for U.S. government agencies, partner-nation defense and interior ministries worldwide, and for prime contractors. Programs are structured around your procurement authority, priced against a defined scope, and are designed from the outset to be handed over.

CORE COMPETENCIES

ISR & Airborne Intelligence. Persistent, wide-area airborne intelligence, from tasking through dissemination, managed as a complete program.

Border & Territorial Security. Every border security problem is different. We assess your terrain, threat profile and existing capability, then configure the solution that fits.

Counter-Narcotics & CT. Counter-narcotics and CT programs are shaped by the operational environment, force structure and threat dynamics of each country. We start with your reality.

C2 & Intel Fusion. Collection generates value only when it reaches the people who can act on it, in the right format, at the right time, through systems they understand.

Sovereign Capability Development. Genuine capability development means your people continue to own and operate every aspect of the mission solution after we leave.

Mission Support & Staffing. The right people, embedded in the right programs. Senior operators, technical specialists, instructors, engineers, analysts and advisors.

COMPANY DATA

CAGE	11S94
UEI	ZRR7NV8TK8Z2
BUSINESS SIZE	Service-Disabled Veteran-Owned Small Business (SDVOSB), within SBA size standards
HEADQUARTERS	Tampa, FL
GOVERNMENT RELATIONS	Washington, DC
EMAIL	info@alphafederal.com
LINKEDIN	/company/alpha-federal

DIFFERENTIATORS

Mission analysis first. Two to four weeks on the requirement before any platform is named.

Platform-agnostic. Three fixed-wing types fielded routinely, and we will integrate onto an airframe you already own.

Structured to your authority. COCO, GOCO, acquisition, lease or hybrid — matched to the procurement authority you actually hold.

All-inclusive pricing. Aircraft, crews, maintenance, mission systems, ground segment and program management as one number.

Built to be handed over. Every program carries a defined transfer milestone with competency criteria attached.

PLATFORMS FIELDDED

KING AIR 350 / 350ER

Long endurance, multi-sensor, pressurized for high-altitude work
Maximum range: 2,690 nm (4,982 km) · Take-off field length: 4,057 ft (1,237 m)

Published manufacturer figures. Take-off distance is published on a different basis by each manufacturer. Alpha Federal will also integrate a mission system onto an airframe the customer already operates.

PILATUS PC-12

Austere-runway capable, lower cost per flight hour
Maximum range cruise: 1,889 nm (3,498 km) · Take-off distance: 2,485 ft (757 m)

CESSNA 208 CARAVAN

Maximum accessibility, minimal infrastructure
Maximum range: 912 nm (1,689 km) · Take-off ground roll: 1,399 ft (426 m)

MISSION SYSTEMS

Tactical uncrewed aircraft on its launcher

Watch-floor fusion and dissemination

- Sensors.** EO/IR turrets from compact to multi-sensor with designation, wide-area motion imagery, maritime search radar, SAR, SIGINT — subject to export licensing.
- Uncrewed systems.** Tactical and small UAS, uncrewed surface and underwater vehicles, and ground robots. Sold, leased, flown as a service, or taught on systems you already own.

Counter-UAS. Detection, tracking, identification and defeat of small drones — fixed site or mobile, integrated into your existing watch floor, sustained and trained.

Ground segment. Fixed, transportable or deployable. Sized to the shift pattern, not the aircraft count.

Exploitation. Live monitoring, post-mission exploitation and dissemination in the format and language the end user actually works in.

CONTRACT ROUTES

OTA	Prototype authority. Fastest route for a non-traditional supplier.
DCS	Direct commercial sale. Ministry contracts us directly.
FMS	Government to government. Slower, politically insulated.
TEAMING	Joint pursuit, task order or consortium — either party leading.

REGIONS

North America · Latin America and the Caribbean · Europe · Africa · Middle East · Central and South Asia · Southeast Asia · East Asia · Oceania and the Pacific

CONTRACT RISK

- Start bounded.** A two-to-four week fixed-fee capability assessment, credited against the program that follows. You own the written output either way.
- Pay on capability.** Milestone structure — aircraft accepted, crews qualified, first sortie flown — rather than elapsed time.
- Evaluate the people.** Key personnel history is the relevant record for a company of this age, and we will put them in front of you.
